

July 7, 2019

**Waldwick Board of Education
Traphagen School
153 Summit Avenue
Waldwick, NJ 07463**

To Whom This May Concern,

Thank you for allowing Paramount Exterminating Company to provide pest management services over the past year. We have endeavored to supply a service that protects the students, staff and property from pests by utilizing Integrated Pest Management strategies.

As part of the New Jersey Integrated Pest Management Act (C.13:1F-24), annual notification of pesticides used within the past 12 months on school property must be distributed to parents, guardians and all school employees. During the period beginning September 1, 2018 to the present, the following materials were applied at this location.

LIST:

<u>Material:</u>	<u>EPA Registration #:</u>	<u>Active Ingredient:</u>
Non-Scented Glue Trap Monitors	N/A	N/A
Advion Ant Gel	100-1498	Indoxacarb 0.05%
First Strike Rodenticide	7173-258	Difethialone 0.0025%

In compliance with the Integrated Pest Management Act we have utilized when necessary products (low impact/botanicals) for all pest complaints. The coordinated effort between **Waldwick Board of Education** and Paramount Exterminating's pest management service is proving effective in quickly solving problems as they are encountered.

As always, if you have any questions or concerns, please contact the IPM Coordinator at the contact information below.

IPM Coordinator: Andy Gamper Telephone #: 201-445-3340

Address: 155 Summit Ave, Waldwick 07463

The IPM coordinator maintains the product label and material safety data sheet, when available, of each pesticide that may be used on school property. The label and data sheet is available for review by a parent, guardian, staff member, or student attending the school. Also, the IPM coordinator is available to parents, guardians, staff members, and students to provide information for, and receive comments about, IPM activities and pesticide use. As part of a school pest management plan, **Waldwick Board of Education** may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure.

Sincerely,
Eric Machel

Integrated Pest Management Policy

The New Jersey School Integrated Pest Management Act of 2002 requires schools to implement a school integrated pest management policy.

The law requires the superintendent of the school district, for each school in the district, the board of trustees of a charter school, and the principal or lead administrator of a private school, as appropriate, to implement Integrated Pest Management (IPM) procedures to control pests and minimize exposure of children, faculty, and staff to pesticides. The **Board of Education** has therefore developed and shall maintain an IPM plan as part of the school's policy.

Integrated pest management procedures in schools

Implementation of IPM procedures will determine when to control pests and whether to use mechanical, physical, cultural, biological or chemical methods. Applying IPM principles prevents unacceptable levels of pest damage by the most economical means and with the least possible hazard to people, property, and the environment.

Each school shall consider the full range of management options, including no action at all. Non-pesticide pest management methods are to be used whenever possible. The choice of using a pesticide shall be based on a review of all other available options and a determination that these options are not effective or not reasonable. When it is determined that a pesticide must be used, low impact pesticides and methods are preferred and shall be considered for use first.

Development of IPM plans

The school IPM plan is a blueprint of how **Board of Education** will manage pests through IPM methods. The school's IPM plan states the school's goals regarding the management of pests and the use of pesticides. It reflects the school's site-specific needs. The IPM plan shall provide a description of how each component of the school IPM policy will be implemented at the school. For Public schools, the Local School Board, in collaboration with the school building administrator (principal), shall be responsible for the development of the IPM plan for this school. For Charter schools and non-public schools, the development of the IPM plan shall be the responsibility of the Board of Trustees or the Principal or Lead Administrator.

IPM Coordinator

The Board of Education administrator shall designate an integrated pest management coordinator, who is responsible for the implementation of the school integrated pest management policy.

Education /Training

The school community will be educated about potential pest problems and IPM methods used to achieve the pest management objectives.

The IPM Coordinator, other school staff and pesticide applicators involved with implementation of the school IPM policy will be trained in appropriate components of IPM as it pertains to the school environment.

Students, parents/guardians will be provided information on this policy and instructed on how they can contribute to the success of the IPM program.

Record keeping

Records of pesticide use shall be maintained on site to meet the requirements of the state regulatory agency and the school board.

Records shall also include, but are not limited to, pest surveillance data sheets and other non-pesticide pest management methods and practices utilized.

Notification/Posting

The IPM Coordinator is responsible for timely notification to students' parents or guardians and the school staff of pesticide treatments pursuant to the School IPM Act.

Re-entry

Re-entry to a pesticide treated area shall conform to the requirements of the School IPM Act.

Pesticide applicators

The IPM coordinator shall ensure that applicators follow state regulations, including licensing requirements and label precautions, and must comply with all components of the School IPM Policy.

Evaluation

Annually, for public schools, the Principal will report to the local school board on the effectiveness of the IPM plan and make recommendations for improvement as needed. For non-public schools and charter schools, the Lead Administrator or Principal shall report to their respective governing boards on the effectiveness of the school IPM plan and make recommendations for improvement as needed.

The local school board or other respective governing boards directs the Principal or Lead Administrator to develop regulations/procedures for the implementation of this policy.
