Attn: Andrew Gamper

Re: AHERA Asbestos Survey of  
Junior/Senior High School  
Crescent Middle School

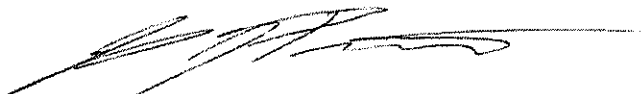

Dear Mr. Gamper:

Pursuant to the EPA/AHERA Regulations every school District is required to evaluate the condition of all asbestos containing materials (ACM) in their district, every six months. Health & Safety Services, Inc. has performed this survey for the Waldwick Board of Education.

Enclosed is the report of the 6 Month Asbestos Survey Report for the aforementioned buildings, the copies are to be distributed as follows: Original to the administrative office file, copies of the report to each school office and for the head custodian of each school. I have also enclosed guidelines for notifications, which are required to be distributed to the parents of attending students, teachers/staff, and organizations.

Once the notifications have been completed, please send a copy of the actual notices to Health & Safety Services, Inc., for our files.

Respectfully,  
Health & Safety Services, Inc.

James J. Proctor  
President
